HON. E. N. RHODES TO RETIRE

GREECE MAY RESTORE MONARCH

U. S. DUCK HUNTING DOUBTFUL

CHINA ACCEDES TO TOKIO TERMS

McFARLAND HEADS GRAIN BOARD

OLIVER BAY, N. S. — Hon. R. N. Rhodes, Minister of Finance, has informed D. R. Cameron, president of the Nova-Scotia Liberal-Conservative Association, ill-health is forcing him to retire from public life and he will not be able to accept a nomination for the forthcoming federal elections. Mr. Rhodes represents the constituency of Richmond-West Cape Breton in the House of Commons.

ATHEISM.—A fair and "bright" monthly restoration of theistic doctrine, promised Tuesday by leaders of the movement.

The assembly will decide when it will be held," said War Minister George Keady, "and the people are assured absolute freedom of choice."

Assembly will decide when it will be held."

The recent election results are not connected with the question of restoration. The people should express their opinion on who should form the assembly. The plebiscite will take place in any case.

EDMONTON.—Heated for Fort Chocoma and Fort Resolution where they will make an intensive study of the wild duck in native breeding grounds. Luther J. Goldman and R. E. Gilman, biologists of the American Birdological survey department of California, left here on the Northern Alberta Railway Train Tuesday for the north.

Alarmed over the steady decrease in the number of wild ducks during the past few years, the United States government is considering a closed season in all parts of the country.

On the reports submitted by Mr. Goldman and Mr. Gilman, will depend largely whether southern sports of the international boundary will be able to shoot ducks next fall or not.

PENING.—Japanese military authorities announced Monday night China had accepted all of Tokyo's demands concerning North China, paving the way for establishment of a "new regime."

Tending to confirm the Japanese announcement, the Chinese National government at Nanking issued a manifesto "forbidding provocative speeches and actions detrimental to the maintenance of friendly relations between China and neighboring countries."

Chinese and Japanese officials joined in expressing optimism the crisis would be settled peacefully.

WINNIPEG.—John W. McFarland, director of federal government stabilizing efforts on the Winnipeg Grain Exchange is expected in some quarters to become chairman of the new grain board provided in legislation now before the House of Commons.

A week ago Mr. McFarland went to hospital for a rest, his physician explaining he was overworked and required a long period of rest, probably two weeks or more. He is still in hospital but is in constant touch with the affairs of the pool and government operations.

STAMPEDE WILL BE HELD HERE WED., JUNE 26

CARBON TO HOLD STAMPEDE JUNE 26

At a well attended meeting of citizens of town and community, held in the municipal office on Monday night of this week, it was decided to hold a stampede in Carbon on Wednesday, June 26.

L. P. Coxon occupied the chair and explained that with united support it was possible to put on the stampede for some \$400 and it was the unanimous opinion of the meeting that the stampede be held on the above date. The following committees were appointed to look after all arrangements: Advertising—C. H. Nash, E. J. Houston, J. H. H. Securing Grounds—L. P. Coxon and J. Garrett.

Grounds—Jas. Flaws, F. Poxon, S. J. Garrett, S. Dym, Neil Cunningham, H. Evans and John Atkinson. Finance—C. L. MacGregor, Otto Schiele, R. F. Torrance. Advertising—C. H. Nash, E. J. Houston, J. H. H. Secretary—R. F. Torrance.

Full details of stampede, etc., will appear in our next issue. Watch for the posters!

Alberta Needs Good Roads

For some time, stress has been laid on the fact that recovery in this country depends upon the obtaining of new and larger markets.

Public speakers have been known to say: "Give us markets, tear down the tariff walls and we will have better times immediately."

How many farmers realize that development of the motor road traffic will bring a cash market right to their door? There would be no tariff walls to scale. The money from motorists would be "right on the line."

How many people prefer to see it and that line would be on the farm. A large volume of motor tourists would spend millions of dollars in Alberta each season for their ordinary supplies which are grown on the farm.

They particularly like to visit the country and from the merchant who handles these products direct from the farmer. They will buy and buy, if only given the opportunity to do so.

But that opportunity will be lost if the motorist is not given modern highways surfaced roads in order to visit the country and enjoy the scenic beauty of the landscape. He has enjoyed smooth comfortable highways south of the U.S. border and will not be inclined to travel far if there is a drastic difference in the north.

To induce the motorist to visit the country and to return year after year, it is necessary to build modern highways. That is the golden investment for this country something which will return the cost several times over in increased business for all.

From year to year, the Alberta Motor Association has been stressing the importance of modern highways in (Continued on Page Three)

With the thought that Carbon is to hold a real old-time stampede on June 26th, comes the memory of old-time riders on the Kneehill.

The above photo was taken at the time of the round-up in Carbon in 1906. Do you recognize them?

From left to right these riders are: Sam Nash, Jack Kirkpatrick, Neil Cunningham, Bert Gandy, Tom Loring, Willie Lee, Mr. Rader, George Coad, Eddie Wilson, Renie Burdett, and the man standing is a cousin of Tom Douglas.

Department of Agriculture Crop Report is Favorable

Establishing the latest record in Alberta's history, seedling wheat was completed in most districts of the province by June 1st.

In the territory northwest and west of Edmonton, where the land not so open to the possibility of being practically abandoned for the season and the crop will be replaced by coarse grains. Seedling wheat in the province is from 30 to 80 per cent completed.

Wheat is covering the ground in most districts and generally speaking, displaying a healthy, even growth. This is particularly true of southern areas, where moisture and weather conditions have been such during the past fortnight as to bring on rapid growth. Coarse grains in many districts are also showing above ground.

The wheat area of the province will be a still further reduction this season. Any actual estimate will not be possible until the June crop survey is complete, but present indications are that it will approximate the reduction of last year, which was in the neighborhood of five per cent on the 31st.

The heaviest reductions in wheat acreage are being made in the northern and northwestern districts, where seedling was unusually delayed by cold wet weather. In some of these districts the reduction is as much as 10 to 20 per cent. In most of the central and southern areas, however, the coarse grain column, but the increase in these will not offset the decrease in wheat. On the other hand, some of the southern areas there has been an actual increase in wheat acreage owing to the very favorable conditions. The net result will be a decrease on the whole provincial wheat area.

Moisture conditions generally may be said to be the most favorable since 1918. In the southern and central areas, warm clear weather has alternated with showers during the past fortnight. In the districts from 200 miles west and north and northeast, however, the weather for the most part has been cool and backward with considerable rain, and with very little warm days thus far. Moisture supply over all the province is stated to be quite sufficient for present purposes.

Grasshoppers have commenced to show in the affected areas in the south, but the backward spring has so delayed the hatching process that the hoppers have not yet constituted a very serious menace in any district.

Grasshoppers are still showing in the affected areas in the south, but the backward spring has so delayed the hatching process that the hoppers have not yet constituted a very serious menace in any district.

Grasshoppers are still showing in the affected areas in the south, but the backward spring has so delayed the hatching process that the hoppers have not yet constituted a very serious menace in any district.

CARBON TROOP BOY SCOUTS NOW ORGANIZED

After some effort on the part of interested parents a few weeks ago, a Carbon Troop of Boy Scouts has been organized and meetings are being held once a week.

S. A. Jase is scoutmaster, Cyril Poxon assistant scoutmaster, and Bruce Ramsay is secretary-treasurer of the organization.

Meetings are being held every Friday evening in the I.O.D.E. Club rooms and 18 boys have already enrolled. Any other who wish to join are welcome and should apply to the officers.

Instruction in gymnastics, carpentry, hiking, drilling, etc., form part of the program of the scouts and other lines of endeavor will be substituted from time to time.

The small fee of five cents a meeting is made to cover incidental expenses. Join up with the Scout organization at its building and you will benefit by setting all the instruction.

HANDICRAFT EXHIBITION AND TEA ON JUNE 29

Don't forget the Handicraft Exhibition and Tea, which is being sponsored by the Duke of York chapter, I.O.D.E., and which will be held in the Parkview Exchange Hall, Carbon, on Saturday afternoon, June 29th.

Entries of handicraft work, collections, art, etc. should be made early so as to enable the sponsors an opportunity to arrange displays.

There will be no charge made for entry of exhibits and admission is free but a small charge of 5c will be made for tea.

Major Douglas's Recommendations

EDMONTON.—Before any scheme of social credit is introduced in Alberta, accumulation of a large amount of "foreign exchange" to permit trade in foreign goods is essential, declared Sir C. H. Douglas, British economist retained by the Alberta government as chief reconstruction advisor, in an interim report made public last Wednesday.

Major Douglas, now en route to London after spending three weeks in conference with the Alberta cabinet, pointed to limitation of provincial powers under the financial act up as at present. His report, filed with the government May 23, was issued Wednesday by Premier R. G. Reid without comment.

Major Douglas makes three recommendations as regards the bringing about of a solution to the existing economic ills through a scheme of social credit.

They are: (1) The systematic provision of a new circulation system under the unchallengeable control of the province, particularly in regard to radio facilities of sufficient power to cover wide geographical area.

(2) The organization of some credit law normal.

Export experts to the U.S. market continue at good prices, the total export from Alberta by May 23rd having risen 15,554 out of a total of all Canada of 48,854. Hog marketing from Alberta to May 23rd totaled 294,775 head, compared with 1,258,318 head from all Canada, and 145,824 head from Ontario. Percentage of sales and bacon marketed was 54.65 per cent of the total of the provinces marketed.

The power of printing lender tender money, or that which passes as money, is undoubtedly of value to the Dominion and has now been delegated to the Bank of Canada.

PAINT BARGAINS
The best quality Paint has been proven the Best Bargain. Government analysis has proven that most cheap paints consist of 30 per cent gasoline or coal oil and 70 per cent of paint. The balance in oils and pigments of doubtful value. Therefore just as soon as a cheap paint is brushed on, at least 63 per cent disappears by evaporation.

REGULAR MEET OF MUNICIPAL DIST. COUNCIL

The regular monthly meeting of the Municipal District of Carbon, Number 273, was held in the municipal office, on Tuesday, June 4th, all councillors being present.

Considerable routine business was dealt with by the council and received a successful attention.

A communication was read from the Department of Public Works stating that the cost of the highway through the municipality would be 40 per cent, and the province would assume the cost of road construction.

Mr. R. F. Mitchell was requested by the council to correct a few surveys which had been made throughout the municipality.

Grasshoppers were reported in the Drumheller section of the municipality and it was decided to open up the rail mixing station at Carbon immediately to provide farmers with poison to combat the pest. This has since been done and bait is now being prepared for distribution to farmers. Reports are to the effect that a few hoppers are now appearing and farmers are requested to poison them immediately.

RODGE STAR ELOPES

If Harry Knight comes to the Calgary Exhibition and Stampede, it is known he will be accompanied by a wife, Ruth Miki, daughter of Tom Miki, famous cowboy actor. The two eloped to New York, where they were married Tuesday.

Harry comes from Banff, and is well known in Calgary, having won the "Prince of Wales" trophy in 1926 and 1922. He was seriously injured when trampled by a horse at the World's Fair, Moose, Chicago, in August, 1924.

Miss Miki, daughter of a famous theatrical family, she was married to Douglas Gilmore, an actor. Their marriage was annulled at Middleton, N.Y., in July 1932—Calgary Alberta.

institution, either under the Dominion bank act or otherwise which will give access to the creation of effective demand through the credit system or, practically, already well recognized and established.

(3) Systematic organization directed at the accumulation of which, for the purpose of the report may be termed "foreign exchange", is, effective demand not subject to attack as being recklessness or having been created within the province.

One paragraph in Major Douglas's report reads:

The first consideration which arises is as to the legality of the claim of the banking system to public credit, taking the law as it stands. It is obviously a consideration secondary to this to consider what sanctions due to the power of public resentment against the water and anti-social claim, could be raised, even though this had become legitimate. In regard to the first question in the province of Alberta the matter is by no means clear."

The power of printing lender tender money, or that which passes as money, is undoubtedly of value to the Dominion and has now been delegated to the Bank of Canada.

PAINT BARGAINS
The best quality Paint has been proven the Best Bargain. Government analysis has proven that most cheap paints consist of 30 per cent gasoline or coal oil and 70 per cent of paint. U.S. PLANES MAKE LONGEST MASS FLIGHT RECORDED

Honolulu.—The longest non-stop mass flight over water in aviation history was completed with clock-like precision here on Thursday as 35 United States navy planes, carrying 30 men on a swift 2,400-mile "routine" transfer from California to Hawaii, alighted at Pearl Harbour in 1-3-3 order.

The overall elapsed time of the planes in the air was 26 hours 21 minutes, but the flying time in formation from the Golden Gate across the perilous stretch of the Pacific to Pearl Harbour was 24 hours and 45 minutes, official time.

They had their troubles with fog, deadweight and darkness. But they came through with certainty. It was not their first swift victory over distance.

A few months ago they flew in formation from Norfolk, Va., to Coco Solo, Panama, and thence to San Diego, Calif.

Some 600 miles off the Golden Gate the squadron dived into its first port tank and the 10-P-5, commanded by Lieut. St John Perry, of Greenville, S.C., became temporarily lost but rejoined the formation upon emerging from the hanging clouds. Four or five hundred miles farther out, Perry got lost again in the same manner, but again came back.

Would Fix Interest Rate

Manitoba Municipalities Recommend Plan Based On What Price Winnipeg, Man.—The executive of the Union of Manitoba Municipalities placed before the Manitoba government proposals for legislation to be introduced at the coming session of the Manitoba House of Assembly. The 29 resolutions called for an important change in the Debt Adjustment Act, which would set a price cap for dealing with interest on farm mortgages.

Adjustment of interest was proposed on the basis of the net track price per bushel of No. 1 Northern wheat at the close of the Winnipeg market September 15. The government was urged to amend the Debt Adjustment Act so that when wheat under such a classification was less than 50 cents, then the interest for that year should be written off.

It was proposed that if the price be over 50 cents, but under 65 cents per bushel, interest should not be more than three per cent. If the price were between 65 and 75 cents the rate would be four per cent, and if the price were 75 cents or over the rate should not be more than six per cent.

Outlook More Hopeful

Feeling In Europe Regarding Disarmament Talks Encouraging.

Toronto.—The report Sir John Simon brought back from his conversations with Premier Mussolini at Rome has created a more hopeful outlook toward disarmament negotiations.

It was believed the report of the secretary for foreign affairs confirmed the view that diplomatic negotiations in the various European capitals, especially Paris and Berlin, were taking an encouraging turn, and that it was desirable that they be continued.

The Times editorially said: "There can be no doubt that to break into Franco-German negotiations, which are making some progress, is far healthier than his trip."

Wins For Second Time

Edmonton, Alberta.—Championship for the best bird in the provincial poultry show here was awarded to a bronze turkey shown by Mrs. Frank Houscher, Car, the bird that was best turkey at the recent Royal Winter Fair in Toronto. Several championship honors on the best bird in the show were sent to Jack Brown, of Chilliwack, B.C., on his champion S.C. Rhode Island Red.

Prince To Visit South Africa

London, Eng.—Prince George has accepted an invitation to climb Table Mountain at Capetown with General Jan Smuts, he announced at a dinner in his honor. In connection with the forthcoming visit to South Africa, the royal highness said he anticipated an enjoyable instructive tour, with good golf in the invigorating South African air.

Lifts Restrictions

United States Government Moves To Enlarge Supply Of Liquor

Washington.—Lifting the restrictions on importations of American type whiskey for 30 days, the United States government moved to enlarge the supply of liquor, lower prices and rout the bootlegger.

What effect the order might have on the Canadian liquor business with the United States was not readily ascertainable. As American type whiskeys have been flowing from Canadian distilleries into the republic outside of any quota restriction, the order was taken to refer to countries other than the Dominion with such right types of liquor.

Bread Control Law

Legislation Governing Selling Of Bread In Alberta To Be Introduced

Edmonton, Alta.—Legislation to control the production and selling of bread in Alberta is likely to be introduced at the coming session of the Alberta legislature. Premier Brown and members of his government were asked by a delegation of master bakers for a law to be introduced to give price control will probably be asked by the government on its own initiative.

That this province should have a Bread Act similar to those in Saskatchewan, British Columbia, and Ontario was the request put forward by the delegation.

Gold Seekers Stranded

Expedition Meets With River Accident In British Guiana

New York.—Associates of William La Varre, head of an expedition exploring the headwaters of the Essequibo River, deep in the jungles of British Guiana, were informed by cablegram of a river accident that would prevent the expedition from continuing its first-stage work and all their supplies.

The accident occurred in the Rupununi River, leaving the expedition stranded in the middle of the river. La Varre indicated the expedition had discovered gold and diamond fields in a region that may prove to be one of the world's greatest sources of such treasure.

Russian Trade Agreement

Soviets Will Purchase Large Quantities Of French Products

Paris, France.—Soviet Russia agreed to buy \$17,000,000 worth of French products within the next year in a commercial agreement which was prepared for signature.

The agreement is to grant Russia credit and a minimum tariff on Russian products not competing with the French. In return, the French will be free to impose quotas on such products.

France's exports to Russia are increased five-fold by the agreement. She exported last year \$3,200,000 worth of products to Russia in 1933.

Fair Pay For Teachers

Alberta Government To Take Action In The Matter

Edmonton, Alberta.—Action is proposed by the provincial government to ensure fair and equitable settlement of disputes between teachers, boards and trustees. Premier Brown has told a delegation from the Alberta section of the Canadian Labor Party.

The Premier stated that the Minister of Education and himself were working on a draft of legislation dealing with the formation of a board of reference and it was hoped that this would be acceptable to all sides.

New Brunswick Sells Bonds

St. John, N.B.—The province of New Brunswick has sold \$799,000 in 20-year 5 per cent. bonds, at \$90, to a syndicate composed of the B. & C. Montreal, Royal Bank of Canada, E. A. Ames & Co., Ltd., Wood, Gundy & Co., Ltd., Eastern Securities, Ltd., and the Dominion Security Corp., Ltd., according to an announcement made by Premier L. P. D. Tilly. The issue was made for the purpose of refunding debentures issued in 1924.

Find Headquarters Intact

Wellington, New Zealand.—Dr. Lincoln Ellsworth, leader of a proposed trans-Antarctic flight expedition, has arrived at the Bay of Whales, Antarctica, to find the Richard E. Byrd expedition headquarters established in 1930 intact. The report of his find was received here in a wire less message to the "Bear," support ship of the recent Byrd expedition to the Antarctic.

Attains Ambition

Girl Who Worked In Harvest Fields Now Concert Artist

Toronto, Ont.—From dishwashing in a restaurant to a highly paid concert artist is the story of Anna Meyerson's success. Anna became a full-fledged Canadian when she was granted naturalization papers and it was then revealed the hardships the young woman fought in western Canada to obtain her ambition.

In the west the young Swedish maid found herself in need of money. She donned men's clothing and worked in the harvest fields. Finally, she reached Winnipeg in a box car and started her dishwashing career for a living.

She worked for a while on reaching Toronto in a hat and dress store, but she lost the job. Then on to Montreal to return to dishwashing.

One day at a party her voice attracted a concert manager. Now Anna is singing for a living.

Next Eclipse Of Sun

Partial Shadow Will Cover Half Of Pacific In February

Northington, Man.—An eclipse of the sun "which ends the day before it begins" will cross the Pacific next month and American astronomers of locally applied to Vancouver to teach courses and head into this temporary night in the interest of science.

The partial shadow will cover nearly half the ocean. Just before sunset it will shade the west coast of Canada and the United States.

ST. LAWRENCE PROJECT IS UP FOR DISCUSSION

Ottawa, Ont.—If the United States congress followed President Roosevelt's suggestion and ratified the St. Lawrence waterways scheme, the treaty would be signed by the Canadian parliament this session for similar action. The understanding has been that Canadian ratification would be withheld until Washington had dealt with the treaty.

United States would bear most of the expense of the international action while Canada would bear the expenditures necessary in the Beauharnois and Lachine sections.

The international section would develop 2,000,000 horse power of electric energy, half going to each country. The Canadian half would be handled over to the province of Ontario which would bear part of the cost of the hydro development.

The proposed waterway was opposed in its infancy by the opposition to the proposed St. Lawrence waterway appeared at the Great Lakes division section meeting of the National Association of Marine Engineers of Canada in convention here.

The proposed waterway was opposed in its infancy by the opposition to the proposed St. Lawrence waterway appeared at the Great Lakes division section meeting of the National Association of Marine Engineers of Canada in convention here.

THRILLS AT THE CHRISTMAS CIRCUIS AT THE OLYMPIA

Every Christmas thousands of Londoners flock to the Olympia to see the famous annual circus and this year the circus again proved the most popular of the Yuletide entertainments in the British Capital. Our picture, taken during the performance, shows the Medrano Sisters, in their wonderful equestrian act. This is their first appearance in England.

CELEBRATES BIRTHDAY

Chief Justice of Ontario, who celebrates his 80th birthday on January 19th.

Sir William Mulock, K.C.M.G., Chief Justice of Ontario, who celebrates his 80th birthday on January 19th.

Hong Kong, China.—Some reassurance regarding the safety of six American missionaries trapped in the Fukien province fighting zone was contained in a report that Nationalist forces will not attack Foochow, the provincial capital and centre of an anti-Nationalist revolt.

The missionaries were isolated when the Nanking regulars and rebel forces engaged in fierce fighting near Kaitien, about 50 miles from Foochow, and disrupted communication facilities made contact with them impossible during the last 11 days.

After a relentless offensive that reportedly brought them to within 25 miles of Foochow, the Nationalists were said to have abandoned the idea of bombing Foochow, hoping that the 10th route army in the capital would capitulate to avoid great property damage.

Safety Of Missionaries

Reassurance Regarding Safety Of Americans In China Is Received

Hong Kong, China.—Some reassurance regarding the safety of six American missionaries trapped in the Fukien province fighting zone was contained in a report that Nationalist forces will not attack Foochow, the provincial capital and centre of an anti-Nationalist revolt.

The missionaries were isolated when the Nanking regulars and rebel forces engaged in fierce fighting near Kaitien, about 50 miles from Foochow, and disrupted communication facilities made contact with them impossible during the last 11 days.

After a relentless offensive that reportedly brought them to within 25 miles of Foochow, the Nationalists were said to have abandoned the idea of bombing Foochow, hoping that the 10th route army in the capital would capitulate to avoid great property damage.

No Navy Building

Australia Has No Intention Of Embarking On Construction Program

London, Eng.—Australia, like Canada, has no intention of embarking on a program of new naval construction.

Rounding out a review of Empire naval policy, authoritative Australian sources in London, in response to enquiry by the Canadian Press, stated Australia had no intention of new naval building. They pointed out that at present she has only one ship building, with no orders and no proposals for any other vessels.

Few Industry Disputes

Regina, Sask.—Only eight industrial disputes occurred in Saskatchewan in 1932, states the Department of Railways, Labor and Industries. They affected 365 employees and 27 companies. Total time lost was 1,191 man-work days. Trades involved were coal miners, printers, plumbers, and motion picture projectionists.

Continue Drive For Highway

Action On Road From The Pas Is Requested

The Pas, Man.—Continuing their drive for action on The Pas highway connecting with the cities of Winnipeg, five organizations of The Pas and Cranberry Portage united to put their case before Premier John Bracken of Manitoba.

The Pas Board of Trade wired Premier Bracken asking if the proposed road had been placed on the provincial program set before the federal government for consideration in anticipated public works schemes to go into effect next spring.

Premier Bracken answered as follows: "The Dominion Government has not requested us to submit a program of provincial works, nevertheless a program has been prepared of plans suggested by various communities which list includes The Pas Highway among provincial works."

The members declared the premier's wire was ambiguous and drafted another asking whether or not The Pas Highway would be on the list next to Ottawa. At the same time Cranberry Portage representatives sent similar wires.

Chicago Milk Strike

Government Must Terminate Stringency Of Farmers

Chicago, Ill.—The Chicago milk strike was ended as the United States government moved toward stern intervention against interference with interstate shipments and with the United States mails.

Settlement of the strike was in the form of a truce signed by representatives of the farmers, the big Chicago dairies, and even the independent dairies, which in the past have refused to guarantee any minimum prices for producers.

Under the terms of the truce, a mediation board of three members, one from the distributors, one from the farmers, and a third to be selected by the first two, will be named to agree on a fair price to be paid for milk.

When the embargo ended there was not a drop of milk for sale in Chicago stores, even families with small children could obtain none, and deliveries to hospitals and institutions were threatened.

DEBT PROBLEM STANDING IN WAY OF RECOVERY

Ottawa, Ont.—Readjustment of international debt was an essential prelude to the building of economic stability, Hon. H. H. Stevens, Minister of Trade and Commerce, told the University Club here.

"The minister continued: "Equally important is that the weight of international debts be lightened by the lowering of interest rates and by extending the term of payment. In some cases, actual 'forgiving of debt' is necessary."

Canada's chief concern was how to secure for the farmer producer a fair return for his efforts. "We know he cannot pay his debt at present prices."

Mr. Stevens favored the redemption of silver. "I hold this view," he said, "that an international currency based on currency with a metallic backing is the most secure; that is, a currency based on silver and gold. Such has been known and understood by all peoples of the world from time immemorial."

He pointed out lessons from the depression, one thing was clear and that was that problems which one, two, or three years ago were abundant in supply were today clearly difficult. If not yet actually solved, the trade minister said, "Where it is clearly that the only remedy is fear, we now know that it is we have to face. What has been deemed 'external virtues' economies have crumbled and failed."

In the realm of finance, one after another the great nations of the world had abandoned the gold standard, he said.

What was to be done? One economist suggested a managed currency, another a commodity dollar, a third an international exchange based on the quantity of primary products, while others urged re-nationalization of silver. One man's opinion was as good as another. He held the view for re-nationalization of silver.

He also pointed out that the paradox of poverty amid plenty is not only possible, but terribly real," said Mr. Stevens.

FRENCH PREMIER FIGHTS CHARGES OF CORRUPTION

Paris, France.—Defending his regime from a barrage of corruption charges in the Chamber of Deputies, Premier Camille Chautemps revealed what he said was a plot against his government in connection with the \$40,000,000 Layons Bank scandal.

While most "voted outside" the Chamber, the premier revealed a coup d'état which he said had been prepared three days ago to place his government in the hands of a directory of a few men "reputed for their energy."

In a fighting mood M. Chautemps told the Chamber that the Democratic regime was endangered when a resignation of the cabinet was envisaged following the death of Secretary "Handsome Alex" Stavisky and the collapse of his huge underground financial empire.

M. Chautemps told the Chamber that the Democratic regime was endangered when a resignation of the cabinet was envisaged following the death of Secretary "Handsome Alex" Stavisky and the collapse of his huge underground financial empire.

Several shots were fired into the air, determined Royalists among students, fought stubbornly. They uprooted trees and iron tree guards along the boulevard and threw gas chairs at police. Traffic was paralyzed.

Canada And World Peace

Dominion In Favorable Position To Assist The Cause

Ottawa, Ont.—Sis reasons why Canada has a special opportunity to contribute to the building of world peace are listed in the discussion outline of the League of Nations Society's national peace study project, they are:

Canada is the only North American British country in the League of Nations; Canada is both an Atlantic and Pacific country.

Canada is both bilingual and bilingual and her treatment of minority problems qualifies her to be of service to the rest of the world.

Canada is associated with six other countries—Belgium, Canada, Czechoslovakia, Greece, Poland, and Rumania—in a position to influence them.

Canada lacks special interest in European questions, but for a number of reasons sometimes qualified to act as conciliator.

Canada possesses great resources in nickel, copper, wheat, etc., which give her power to assist in preserving world peace and in maintaining the war.

The outline which has been prepared by a committee of experts in education presents discussions for 10 meetings.

Dance Tunes Banned

Montreal, Que.—Eight of the latest dance tunes will not be heard over the air, at least from station "RCM" in Montreal. Mr. Justice Pierre Curran having issued an interim injunction to the Canadian Performing Rights Society against the Canadian Radio Broadcasters' Association.

Feed Grain Shortage

Saskatoon, Ont.—Shortage of feed grain has become so acute in Lambton county, Ontario, that farmers are being urged to "share" their grain. It is said they have to "draw" from their seed grain reserves. Feed grain crops were poor last year and with most of the winter feeding still to be done it is certain feed will have to be imported.

What For Russia

Calgary, Alberta.—Ten thousand bushels of German wheat, raised in the Ohio district, have been shipped to Russia apparently for seed purposes, according to an announcement by the Alberta wheat pool. This was part of a Russian commodity dollar, a thing which will be loaded out of New York during the present month.

Allow Of Gold

Washington, D.C.—John G. Collier, 42nd port to Russia in 1931 in a special bill which was introduced in Toronto, was given power to borrow by the U.S. Department to enter the United States for not longer than 90 days.

Editor and PublisherAlberta Needs
Good Roads

(Continued from front page)

this province. Perhaps one of the
strongest arguments of the claim
as to the value of the tourist business
was given in the last session of the
Provincial Legislature by Hon. J. J.
Macdonald, Minister of Public Works.
He then predicted that the day was
rapidly approaching when there would
be a modern hard surfaced highway
running north and south in the province
to help the needs of the ever
growing tourist trade.

Now that two elections are pro-
ceeding and the other dominion, are
in the office, farmers are urged to re-
quire candidates to declare themselves
on this question of building modern
highways to attract tourist business in
this country. Candidates should be
"put on the spot." If they are given
a chance at the coming elections,
then there will be definite and definite
action in meeting the road and tour-
ist requirements of this country at a
time when action is vital.

ABERHART HOPES FOR
UNANIMITY

The fact that the Alberta Social Credit
League was not stating the principles
of Major C. H. Douglas was being
made for the purpose of confusing the
people, William Aberhart, social credit
leader, charged, when he denied
that there was any appreciable differ-
ence in the two systems during his
Friday evening broadcast.

Mr. Aberhart asked however, what
difference it made if Major Douglas
did differ in some details, saying he
himself was quite prepared to have
his proposals corrected. No one, he said,
could intelligently present a plan un-
less he had the authority to do so, and
was able to get the information re-
quired.

The first thing Mr. Aberhart liked
about Major Douglas' lecture, recent
he said, was that it had taken away
the criticism of himself and directed
it toward Major Douglas. He pointed
out that the people were saying the

British economist was receiving a
dollar a week, but that they were for-
getting all the study that Major Dou-
glas had put into it.

Hopes For Nominations

Major Douglas, the speaker said,
seemed to anticipate major difficulties
and much opposition. Mr. Aberhart
charged, however, that the support for
social credit would be so unanimous
that many of the difficulties would
disappear. "I am delighted to see he
does not consider the difficulties in-
superable," he added. "He has once
more declared his belief that it can
be introduced into Alberta."

The editor cannot insist at your
home to see if there is any news. If
you know of any, send it in. We
want all the news there is, but no
man can get all. We are just as
eager to mention your company or
visions as we are those of your
neighbors, but probably your neigh-
bors give us more assistance in as-
sessing facts. We are always ready
to receive local news. If any of our
readers know of an accident a per-
sonal item, a birth, a marriage, a
death or anything that may be of in-
terest, if they would send it to us
either personally or by mail, we
could always be pleased to publish

Snicklefritz ----

It has often been asked what does
this nation stand for and the answer
is easy—too much.

Willie—"Please, teacher, what did I
learn today?"
Teacher—"What a peculiar question!"
"Well, they'll ask me when I get home."

MAY FIGHT HOPPER WITH PLANE

Possibility of the use of airplanes for
scattering of poison bait for grasshoppers
is being investigated by Hon. F.
S. Grisdale, minister of agriculture.
Hoppers are now beginning to hatch
and farmers are urged to be on the
lookout for them and report to their
nearest authority at the earliest pos-
sible moment.

Speed Fiend—"Gosh! Don't you feel
slad you're alive?"
Passenger—"Glad isn't the word, I'm
amazed."

"How's your wife getting along with
her driving?"
"She took a turn for the worse last
week."

Roadie: "Aren't you getting Johnnie
and Bill confused?"
Mary: "Yes, I get Johnnie confused
one night and Bill the next."

He—"I suppose I'm only a little pol-
ite on the beach of your life?"
She—"Yes, you might stand a chance
if you were a little bolder."

Doris: "Is George generous, Mahel?"
Mahel: "Believe me, when it comes
to throwing his money about, he's the
president of the Anti-Litter League!"

Harold: "Now that you have looked
over my music, what would you like
to have me play?"
Rena: "I think we had better play
cards."

Little Sophie—"Father, what is ex-
ecutive ability?"
Professor Breadhead—"The faculty
of earning your bread by the work of
other people."

He: "But don't you cook much more
than we use darling?"
She: "Of course, but if I didn't,
how could I maintain my making left-
over dishes?"

Mabel—"Doesn't that Scottish boy
ever take you to the cinema, son?"
Phillips (bitterly): "No, I think he
must have found a girl who can see
pictures in the dark."

Woman learning to drive: "But I
don't know what to do!"
Her husband: "Just imagine that
I'm driving."

Printing of
Distinction

Just because a local firm gives us
some of its printing is no reason for it
sending out of town for a few odd jobs.
We want ALL your Printing. We need it
all in order to survive these trying times.
Remember this—IF it's Printing, we can
do it—always.

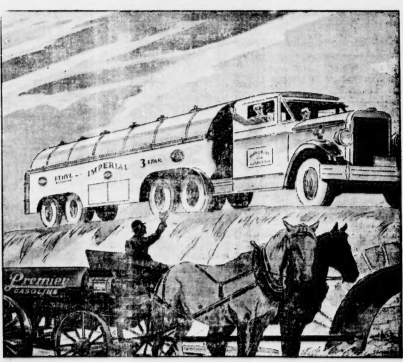

**DON'T PASS UP YOUR LOCAL PRINTER

A United States paper suggests that
the chain-letter method might be used
in collecting war debts. Except for
the fact that no European nation has
five friends.

How was the scenery on your trip?
It ran largely to tooth paste and
smoking tobacco.

Yeah, when has a fellow horse sense?
When he can say, 'nay', son.

A LITTLE COMPANY GROWN BIG

IMPERIAL OIL was a little Com-
pany in 1880. There was then
only a handful of employees. A
dozen or so products were the Com-
pany's stock in trade.

Today nearly 18,000 Canadian men
and women are engaged in making
and selling 714 different Imperial Oil
Products. So, counting their families,
there are about 90,000 people directly
dependent for livelihood on this
Company and its operations. 90,000
is a lot of Canadians.

Imperial Oil's growth
depended upon more
than growth in popu-
lation and demand.
Fair dealing, honest
value and the ability to
meet new needs with

new products and new services all
played their part. Of course, a loyal,
capable staff was indispensable. Such
a staff was built up by fair and con-
siderate treatment. Good wages,
sickness and death benefits, retire-
ment pensions, group insurance,
industrial councils—these are some of
the measures by which the Company
has recognized its responsibility to the
men and women in its employ.

These men and women have recog-
nized in turn their
responsibility to the
Company. By loyal,
whole-hearted service
they have helped it to
make better products
at lower cost and thus
become a big
company.

BANKING IDEALS THAT LIVE ON

"The value of that enterprise (the Bank of Montreal) ought not to be measured by its success as a joint-stock undertaking, by the amount of its capital or the size of its dividends, but by the security it has given to those who have trusted it, the facilities it has furnished for the exchange and the increase of commodities, and the assistance it has contributed to the development of the country."

The Bank, now well on in the second century of its life, still wishes to be measured by the considerations mentioned in the foregoing quotation from "The Centenary of the Bank of Montreal," published in 1917.

Security, facilities, assistance--these have been the objectives of the Bank since its foundation in 1817. They are the objectives of today and will be in the tomorrows of Canadian life.

CARD OF THANKS

Mr. and Mrs. E. J. Garrett wish to thank the people of Carbon and community who helped in any way during their recent sad bereavement.

SINCLAIR RAPS FUSION PROJECT

In every case where an independent candidate had been suggested the Liberal candidate was the one who was to be asked to withdraw. A. MacLeod Sinclair, K.C., declared, speaking over the air Friday evening last on behalf of the Liberal party. He referred to the recent attempt to effect a fusion of the three parties in Little Bow constituency and contended that the so-called independent candidate was in every case a man high in the councils of the United Farmers of Alberta.

The first instance of this proposed fusion, Mr. Sinclair said, was at MacLeod, where the so-called independent candidate was to be W. H. Shield, U.F.A., and this was followed by other similar incidents, notably in Vulcan, where O. L. McPherson was nominated. He also referred to attempts made, he said, in Drumheller riding, where A. B. Claydon, U.F.A. was to be the independent candidate, and said that Hon. George Headley, minister of Health, was quite prepared to sacrifice himself for his party and run under the colors of another stable.

WHALES DAMAGE CABLES

Three whales have been landed at Wellington by Captain Horne, although he is not a whaler. His job for the past 12 years has been to inspect and keep in good repair one of 100 miles of telegraph cables. The three monsters he found had apparently become entangled in the lines and had drowned themselves. They had evidently mistaken the cable for the tentacles of the octopus, and had closed their mouths upon them. Owing to the structure of their jaws they could not free themselves. In their efforts to release themselves they did considerable damage to the cables.

A new radio amplifier would enable a politician to throw his voice a mile. The only trouble is that he would still be able to stick it.

It is bad when a fellow loses interest in everything that it's worse when he loses capital.
